Workflow Summary:

Service Line:

Related Solution(s): Bridge Transfusion Administration

Project Name: Niagara Health System:OPT-0297674:NIAG_CD Niagara HIS RFP

TestBuilder Script(s):

Cerner Workflow ID:

Client Workflow ID: 1057

Workflow Notes:

Introduced By: WS 3.2

Validated By: WS 5.2

Swim Lane:

Role(s): Nurse (RN)

RPN [Custom]

Department(s):

Security Position(s):

Start/Stop [3]

Description: The patient has a transfusion running in Bridge that was started in error

Work Step [5]

Description: Open Cerner Bridge

Work Step [6]

Description: Scan the patient's wristband to identify the patient

Work Step [7]

Description: Select 'End Transfusion'

Future State: Bridge Transfusion - Transfusion Started in Error/Unlocking a Unit

Cerner Workflow ID: Client Workflow ID: 1057

Last updated by Julianne Morosin, Mar 10, 2025 2:06pm (UTC -4 hours)

Work Step [11]

Description: Scan the unit number and blood product barcodes from the blood bag or if unable to scan, select the unit from the list.

Work Step [13]

Description: Document end transfusion date and time, record the volume transfused as '0', and comment 'Transfusion started in error'

Work Step [15]

Description: Select 'No' from the dropdown asking if there was a reaction and select Continue

Work Step [18]

Description: Document end transfusion vital signs

Work Step [20]

Description: Click Continue to complete the end transfusion documentation and return to the patient chart

Work Step [22]

Description: Select 'Browse Transfusion History'

Work Step [24]

Description: Identify the transfusion that was started in error

Comments: This can be done by comparing unit numbers or finding the transfusion with a '0' in the volume column.

Work Step [26]

Description: Select the checkbox in the 'Unlock' column that corresponds with the transfusion that was started in error

Comments: Will be located directly to the right of the volume within Browse Transfusion History.

Work Step [28]

Description: Select the 'Unlock' button in the top right of the screen

Comments: Once the checkbox is selected for the transfusion that was started in error, the Unlock button in the top corner should go from greyed out to blue.
