For patients with positive pregnancy test, once pregnancy added review and update pregnancy history

- Document assessment in **OB Triage** iView band (including importing, verifying and signing off vital signs)
- When ultrasound report available, RN to notify on call OBGYN for consultation and plan of care

 Nurse to navigate to **Results Review** tab within the Table of Contents to review US

OBGYN now at bedside

- Provider assesses patient
- Provider login to PowerChart and access patient's chart from tracking board
- Provider to review Triage/Ante/Labour tab in Women's Health View
