

TIP SHEET

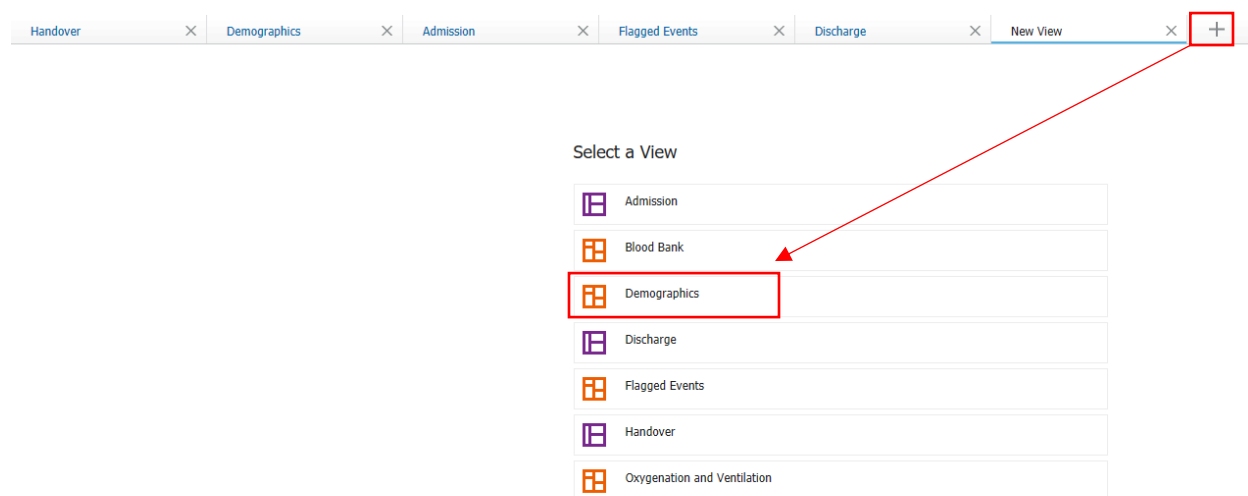

HOSPITAL INFORMATION SYSTEM (HIS)

NAVIGATING DEMOGRAPHICS MPAGE

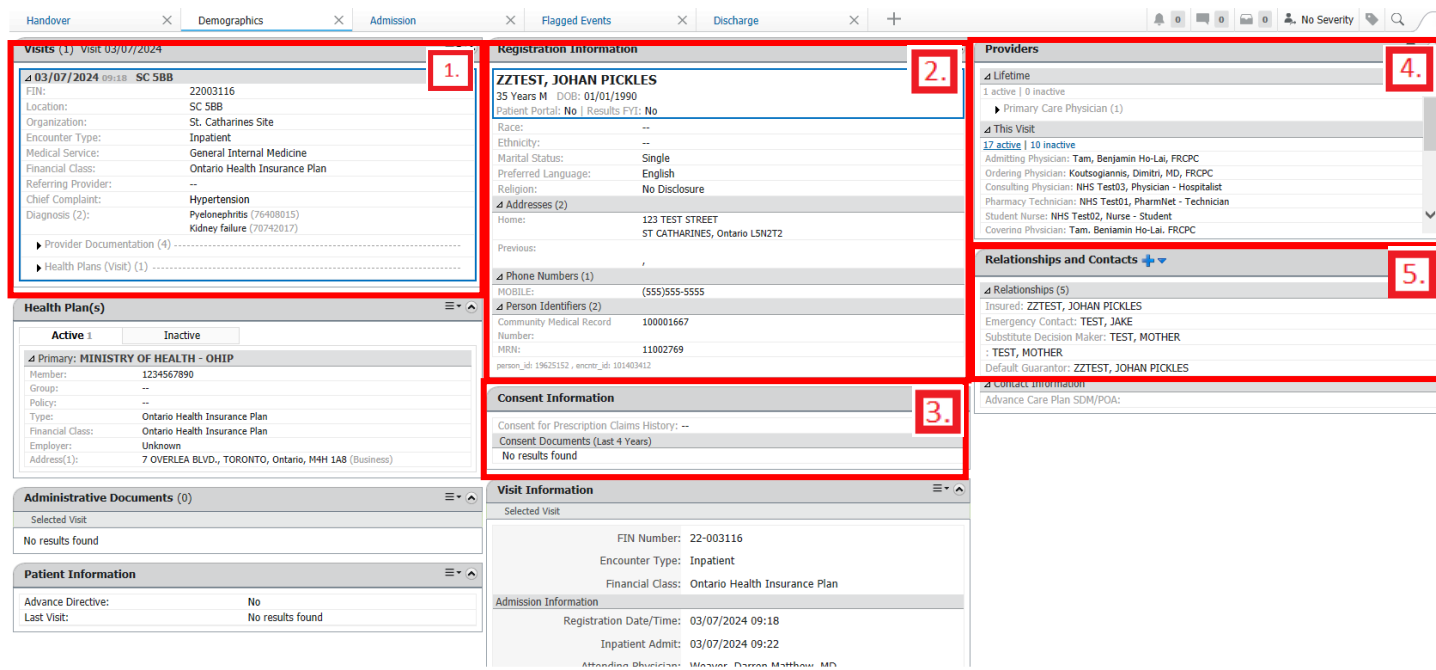

To provide further resources to the inpatient teams, HIS is moving forward with implementing the Demographics Mpage to ensure that all staff have the accessibility to the correct demographic information when caring for their patients.

This new Mpage will be added to all end users (EU) views wherever they see their Mpages. If the EU does not see the Demographics Mpage, the user would need to bring it on view for them. To do this the EU must:

1. Navigate to the roles Mpage View.
2. Select the “+” on the top menu bar. The EU must select the **Demographics** option. Once selected they have this Mpage accessible to them.

To navigate the Demographics Mpage, there are some key sections that will assist the EU.

The screenshot displays the following sections:

- 1. Visits (1):** Visit 03/07/2024, SC 5BB. Details include location (SC 5BB), organization (St. Catharines Site), encounter type (Inpatient), medical service (General Internal Medicine), financial class (Ontario Health Insurance Plan), and chief complaint (Hypertension, Pylonephritis, Kidney failure).
- 2. Registration Information:** Patient ZZTEST, JOHAN PICKLES, 35 Years M, DOB: 01/01/1990. Includes race, ethnicity, marital status, preferred language, religion, addresses, phone numbers, and person identifiers.
- 3. Consent Information:** Consent for Prescription Claims History: --. Consent Documents (Last 4 Years): No results found.
- 4. Providers:** Shows 17 active and 10 inactive providers, including Primary Care Physician (1), Admitting Physician (Tam, Benjamin Ho-Lai, FRCPC), and others.
- 5. Relationships and Contacts:** Lists 5 relationships, including Insured (ZZTEST, JOHAN PICKLES), Emergency Contact (TEST, JAKE), and Default Guarantor (ZZTEST, JOHAN PICKLES).

1. Encounter/Visit information – Includes all pertinent plans and information in relation to the patients current encounter
2. Registration Information – Includes socio-demographic data of the patient, as well as personal identifiers
3. Consent Information - Any consents completed and uploaded to PowerChart will show here
4. Providers – Includes all relationships (active and inactive) that are with the patient.
5. Patient SDM/POA/Emergency Date/Time/Contact information. The information in this section comes from when the patient comes to the hospital and registration completes their screenings. The EU can hover over the names within this section and find all contact information for the patients contacts.
