Workflow Summary:

Service Line:

Related Solution(s): Surgical and Endoscopic Imaging
Surgical Management

Project Name: Niagara Health System:OPT-0297674:NIAG_CD Niagara HIS RFP

TestBuilder Script(s):

Cerner Workflow ID: 6271 (v. 11.0)

Client Workflow ID: 121

Workflow Notes: This workflow outlines the process for capturing images during a surgical or endoscopic procedure and posting them to the patient's chart.

Introduced By: WS 6

Validated By: WS 7

Swim Lane:

Role(s): Circulator/Procedure Nurse

Department(s):

Security Position(s): Perioperative - Nurse

Off Page Reference [18186]

Workflow Link: Perioperative - Intraop/Intraprocedure

System [18196]

Description: Patient information is sent to the imaging system via patient check in at start of case

Comments: If utilizing the SIU Scheduling interface, the Procedure is also included.

Future State: Perioperative - Surgical and Endoscopic Imaging

Cerner Workflow ID: 6271 (v. 11.0) Client Workflow ID: 121

Last updated by Anjanette Balboa, Mar 14, 2025 11:36am (UTC -4 hours)

Work Step [18189]

Description: Open and validate the patient on the imaging device

Off Page Reference [18218]

Workflow Link: Perioperative - Intraop/Intraprocedure

Comments: Return to the Intraop workflow for remaining non-image related steps.

Work Step [18201]

Description: Upon completion of the procedure, select to send the images to the patient's chart

Comments: Typically, the nurse will simply send the full list of images into Millennium (this is almost exclusively true for GI cases as the physician typically needs to get to their next procedure quickly). However, there could be instances for a surgical imaging case where the surgeon may want to review the images in the imaging system and delete any unwanted images before sending them to Millennium.

System [18203]

Description: Images are sent from the imaging system and post to the patient's chart in Millennium

Comments: Images are sent from the imaging system into a network file share, and are then retrieved via Cerner's Batch Prep service and made to be viewable within the Clinical Media (MultiMedia Manager) chart component in PowerChart. The process is near real-time, typically taking up to a minute.

Work Step [18224]

Description: Within the Workflow MPage, tag appropriate images for inclusion in the discharge note

Method: MPage

Start/Stop [18216]

Description: End of process

Swim Lane:

Role(s): Proceduralist

Department(s):

Security Position(s): Physician - Gastroenterology

Future State: Perioperative - Surgical and Endoscopic Imaging

Cerner Workflow ID: 6271 (v. 11.0) Client Workflow ID: 121

Last updated by Anjanette Balboa, Mar 14, 2025 11:36am (UTC -4 hours)

Work Step [18192]

Description: Capture images as needed throughout the procedure on imaging device

Work Step [18210]

Description: Annotate, resize, rename, and/or delete images as needed within the Media Gallery workflow component

Method: PowerChart

Work Step [18244]

Description: Tag images as needed within the Provider workflow for inclusion in the Dyn Doc note

Method: MPage
