

# **ATTENTION:**

## **SUSPECTED MEASLES CASE?**

**Help Us Protect Patients & Staff - Follow These Steps**

### **MEASLES IS HIGHLY CONTAGIOUS**

Measles spreads through the air and can linger for hours after an infected person leaves.  
To protect others, please follow this process before entering.

#### **STEP 1**

### **CALL AHEAD TO 905-378-4647 x0**

If you suspect measles (fever, rash, cough, runny nose, red eyes), please call before coming inside.  
You will be connected to a healthcare provider who will guide you on what to do next.

#### **STEP 2**

### **WAIT IN YOUR VEHICLE**

To keep others safe, please remain in your vehicle while we prepare an isolation space for you.  
A healthcare provider will call you when we are ready.

#### **STEP 3**

### **STAFF WILL ESCORT YOU INSIDE**

Our team will wear protective equipment and guide you to an isolated space for care and possible testing.

**Your cooperation helps reduce the spread of measles and protects everyone in our hospital. Thank you!**

**QUESTIONS? CALL AHEAD BEFORE ENTERING.**
