Decision [1406]

Description: Will procedure be completed by Ordering Provider?

Work Step [16851]

Description: Place Referral order to specialty completing procedure

Method: PowerOrders

Off Page Reference [16968]

Workflow Link: Ambulatory - Referrals (Originating)

Start/Stop [16937]

Description: Complete documentation

Decision [16888]

Description: Will procedure be completed at today's visit?

Work Step [16911]

Description: Place order for Return to Clinic. Enter procedure details.

Method: PowerOrders

Off Page Reference [16962]

Workflow Link: Scheduling - ESM - Schedule Appointment

Work Step [1546]

Description: Place procedure order

Method: PowerOrders

Step Impact: Financial

Comments: Order is necessary to capture charge

Decision [16954]

Description: Will the procedure be completed by the Prescriber or clinical team member?

Future State: Ambulatory - In-Clinic Procedure

Work Step [16940]

Description: Obtain written consent to perform procedure. Consent is scanned into the chart by ward clerk

Work Step [16870]

Description: Perform procedure, place medication orders for medications to be administered by the nurse.

Step Impact: Financial

Comments: Provider must place order for medications in order to document and charge for administration. Medications to assist in procedure i.e. Lidocaine do not need to be placed as separate medication orders and are generally included in the global procedure charge.

Work Step [16872]

Description: Document procedure including medications given during procedure within provider procedure note (see comments)

Step Impact: Financial

Comments: Provider will will document medications in their procedure note.

Medications administered by the provider during the procedure should be documented by the provider who is administering. We do however have the ability for the documentation be added by by the clinical staff by changing "Administered By" to Provider who administered if a sterile environment.

Work Step [16902]

Description: Enter procedure on procedure history (if applicable)

Work Step [16903]

Description: Place Return to Clinic order if applicable

Method: PowerOrders
