

### INTERPROFESSIONAL REHAB

**\*Note:** The therapist must first complete the Alpha FIM web form (available outside of Millennium via the **UDSMR website**) to calculate the necessary scores.

- The Alpha FIM PowerForm is available via AdHoc and should be completed when the prescriber identifies the patient as having a hemorrhagic or ischemic stroke.

- After completing the Alpha FIM calculations on the UDSMR website, the therapist should fill out the AdHoc'd PowerForm in Millennium by entering the results into the appropriate DTAs.
