

DOCUMENTING GOALS

HOSPITAL INFORMATION SYSTEM (HIS)

INTERPROFESSIONAL REHAB

Short Term Goals & Long Term Goals

- Both of these Goals sections utilize Last Charted Value (LCV); meaning that any data entered into these Ultra Grids will carry forward the next time a PowerForm with these sections is accessed.
 - o These fields can be modified, edited throughout as well and LCV will carry on from the most recent change.
- The Short Term Goals sections are filled with several Ultra Grids, each categorized to a general functional category. The corresponding Alpha responses differ depending on said functional grouping.
- The Long Term Goals sections are comprised of the Patient/Caregiver Goals and the Long Term Goals. These grids utilize freetext to allow for unique entries.
 - o *Note: Patient/Caregiver Goals are from the patient's perspective. The clinician has to choose the appropriate disciplines who would be responsible for facilitating these goals.
- The data entered into these Sections/Grids is used in many locations all throughout the patient's chart.
- Each discipline's Goals can be found together within Results Review, specifically in the Rehab Goals flowsheet.

PT Acute/Inpatient Assessment - Z2REHAB, CURTIS

Performed on: 15/Oct/2024

Short Term Goals

Goal #	Goal Description	Assist	Equip	Status	Date Met	Comment
Goal #1	Transfer to wheelchair	Complete independence	None	Initial	17/Oct/2024	Ability to sit into a vehicle; needs to reach a score of 10

DOCUMENTING GOALS

HOSPITAL INFORMATION SYSTEM (HIS)

Discharge SMART Goals (PT, OT & SLP Only)

- These SMART (Specific, Measurable, Achievable, Relevant and Timebound) Goals are to be filled out only if patient is being discharged with home care services or if therapists are requesting further inpatient and/or outpatient rehabilitation.
- The Discharge SMART Goals sections and their contained Ultra Grid utilize Last Charted Value (LCV).

PT Discharge SMART Goals

Specific, Measureable, Achievable, Relevant, and Timebound (SMART) Goals are to be filled out only if Patient is being Discharged with Home Care Services or if Therapists are requesting further Inpatient and/or Outpatient Rehabilitation

PT SMART Goals

PT SMART Goals

Goal #4	
Goal #5	
Goal #6	
Goal #7	
Goal #8	

In Progress

***Note:** Text that is filled into this Ultra Grid will flow into the Case Managers Complex Care and Rehab High Referral Application PowerForm as a smart template text box.

***Note:** Once a therapist recommends ongoing inpatient rehab, they should promptly AdHoc their assessment PowerForm to document Discharge SMART goals, which will then activate the smart template in the Case Managers Rehab Referral PowerForm.

***Note:** Once a therapist recommends home care, they should promptly AdHoc their assessment or discharge summary PowerForm to document Discharge SMART goals.
