

Clerical Staff:

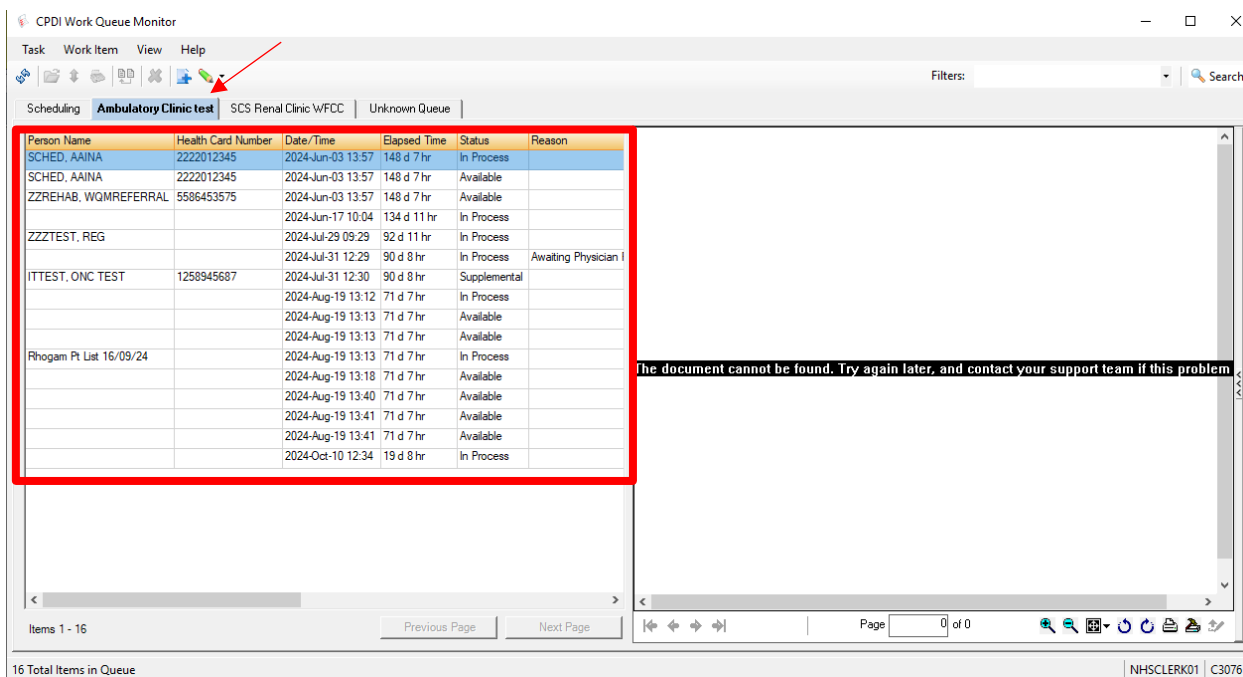

1. Navigate to **Work Queue Monitor**, this can be done two ways:
 - a. Through your **App Bar**, locate the purple icon with two pieces of paper.

- b. Through Powerchart you can open your **Scheduling Appointment Book**, within the appointment book locate the purple icon in the top banner bar.

2. When in Work Queue Monitor, select the tab corresponding to your department's queue (e.g., Ambulatory Clinic). You are now able to see all of your incoming faxes on the left window pane, they present in chronological order.

Outpatient Nephrology Referral Form for Primary Care Providers

Ontario Renal Network | **Kidney Wise** Detect + Protect

To our primary care provider colleagues:

Please find an Outpatient Nephrology Referral Form developed by the Ontario Renal Network (ORN). Recommended reasons for referral of patients with nephrological problems are outlined, and these closely mirror the ORN's KidneyWise Clinical Algorithm and Evidence Summary. While patients (and their primary care providers) often want to arrange a timely appointment so that their clinical concerns can be addressed and/or alleviated quickly, most nephrologists will triage referred patients based on level of need. Those patients who are at high risk of progressing to end-stage renal disease and/or who may require a renal biopsy for diagnosis are usually seen more urgently.

Typical indications include:

- Very low renal function (eGFR < 20 ml/min/1.73m², confirmed on repeat testing)
- Rapidly declining renal function (eGFR decline ≥ 10 ml/min/1.73m² within 2 to 4 weeks, confirmed on repeat testing)
- Nephrotic syndrome (edema with severe proteinuria – i.e. urine ACR > 150 mg/mmol or 24-hour urine protein > 3.5 g/day and serum albumin < 25 g/L)
- Suspected glomerulonephritis or renal vasculitis (hematuria with > 20 RBC/hpf or RBC casts associated with proteinuria, declining renal function and/or positive immune markers)

Please note that the use of NSAIDs should be discontinued prior to confirming very low or rapidly declining renal function, as this is a common reversible cause of a decline in eGFR. Also, note that initiating the use of an ACEi or ARB may cause a reversible decline in eGFR (up to 30%) that does not necessarily warrant referral.

If you feel that circumstances warrant referral of a patient with CKD who does not meet the recommended referral criteria on the Outpatient Nephrology Referral Form, particularly in younger patients, contact your local nephrology group for further advice. If you feel your patient needs to be seen within 24 hours, contact the nephrologist on call in your region for further discussion.

Alan Gill
Dr. Alan Gill, MD, CCFP, MPH
Provincial Primary Care Lead, ORN

Scott Bramble

Provincial Lead, Early Detection and Prevention of Progression, ORN

The KidneyWise Clinical Toolkit helps primary care providers identify, detect, and manage chronic kidney disease (CKD).

The KidneyWise Clinical Toolkit helps to:

- Determine which patients are at high risk of developing CKD
- Provide recommendations on how to properly diagnose and best manage the disease to reduce risk for further progression
- Guide clinicians on which patients might benefit from referral to nephrology

Search Reset

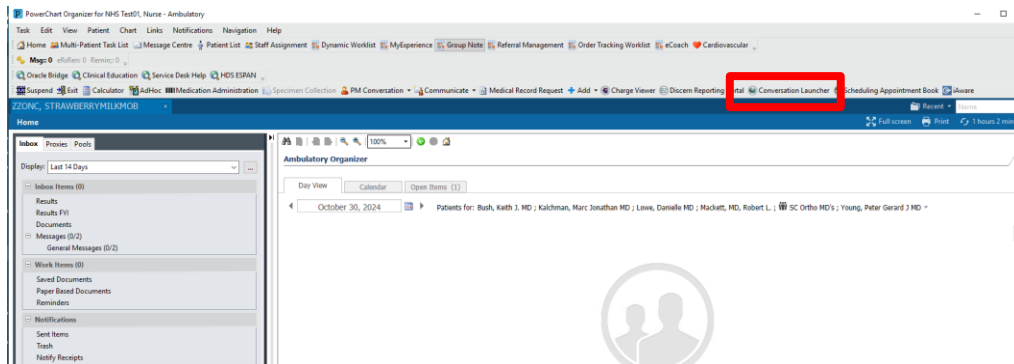

OK Cancel All Encounters

You will notice no MRN or FIN number will populate, this is intentional as we do not want to associate this referral with an encounter yet until it is accepted, this is just the initial intake.

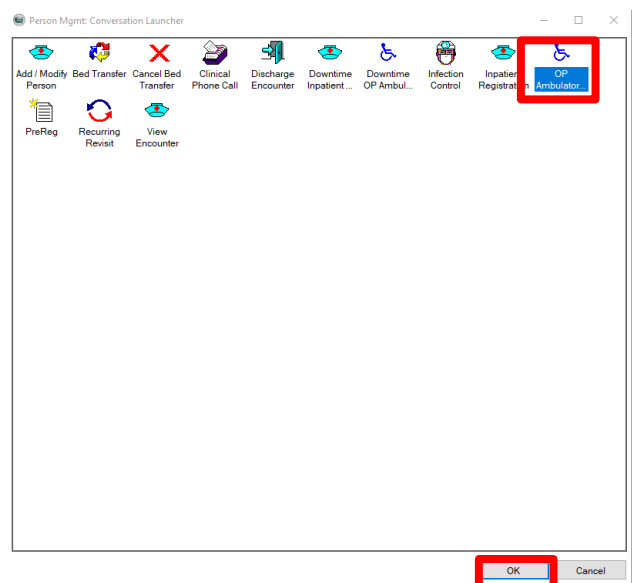

*****IF THE PATIENT IS NOT BUILT INTO THE SYSTEM*****

- Navigate to **Conversation Launcher** in your App Bar or in PowerChart

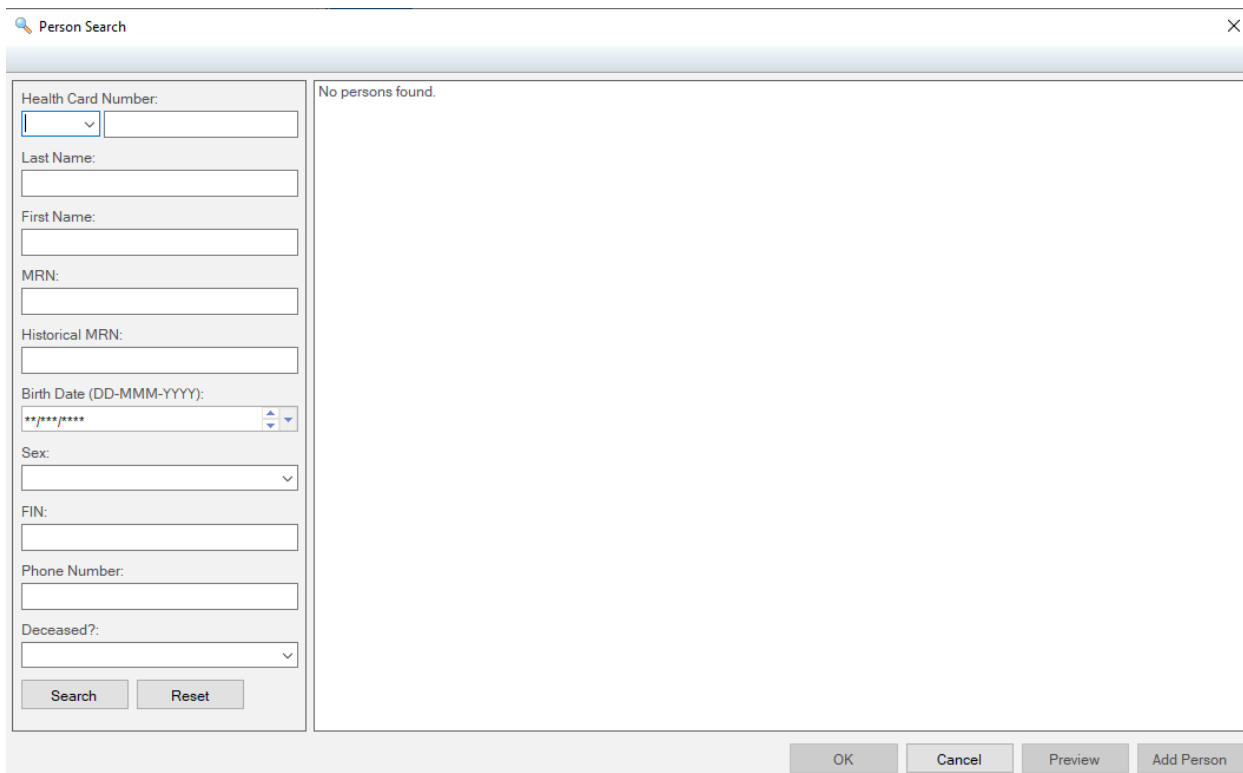

- Then select **OP Ambulatory Registration** and select **OK**.

- Now you will input all of their information and select **Search** then select **Add Person**.

Person Search

Health Card Number:

Last Name:

First Name:

MRN:

Comment:

Edit the "Date of Service" if desired.

7. When documentation is complete, select **OK**.
8. Now when navigating back to Powerchart and opening the patient chart, this form will be visible under **Documentation**.

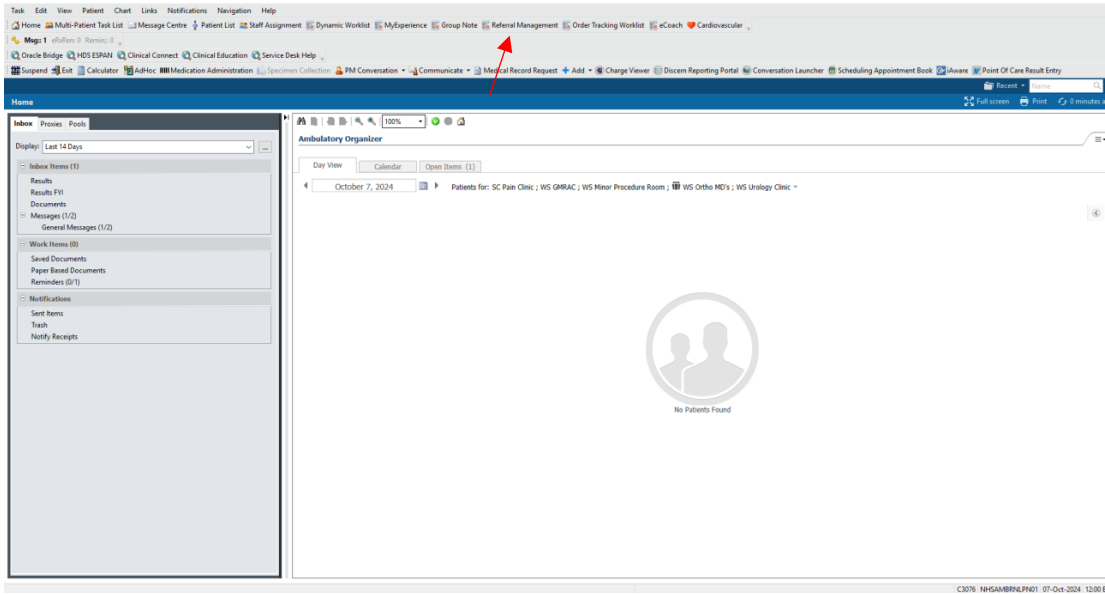

The screenshot shows the Powerchart interface for patient ZONIC, STRAWBERRY MILKMOB. The top banner displays patient details: MRN 11054390, Age 27 years, Allergies: No Known Medication Allergies, Attending: Dose Wic: No Data Available, PreRay FIN: 22-006311, Loc: SCS. The left sidebar has 'Results Review' highlighted in red. The main area shows a 'List' of documents with the following table:

Service Date/Time	Subject	Type	Facility	Auth
2024-Oct-17 15:06:53	Referral Form -	Referral Form		
2024-Sep-20 15:48:11	Physician Order	Physician Order	SCS	
2024-Sep-20 15:41:11	Outside Records - free text -	Outside Records	SCS	

The document viewer below shows a 'Final Report' for a 'Referral Form'.

Now that the documentation has been added to the patient chart. We can create an inbound referral to add it to the clinic's referral list.

9. Navigate to **Referral Management** from the top banner bar.

10. Ensure the correct worklist is selected, each clinic should have an **Originating** and **Receiving** list. For this you can select either list as we will be creating an **Inbound Referral**.

11. If you do not have the correct worklist to add a worklist select **List Maintenance**.

- a. “My Phrases”-contains the auto texts you have created.
- b. “Public Phrases”-contains all model auto text that are built in Cerner.
- c. The “Add/+” button -allows the user to create a custom auto text.

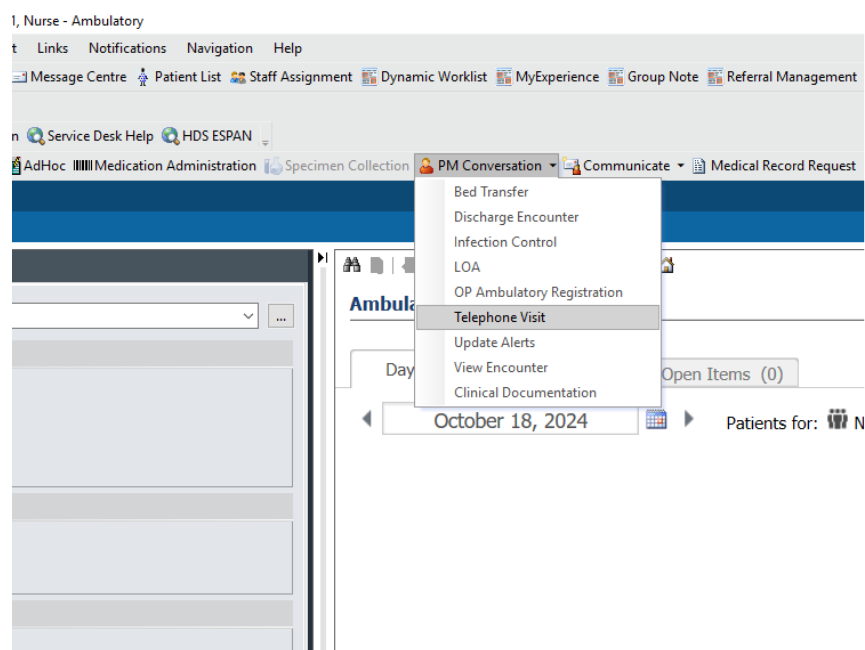

The following are currently built out as PDAP Autotexts.

Charting For PDAP

*Initial Intake, since most of the intake pertaining to your clinic occurs on the phone, you would utilize **PM Conversation**.*

The use of PM Conversations: Telephone Visits is for patient interactions that are not booked appointments, but need to be logged as visits for the purpose of keeping statics on the amount of time staff are spending with patients. This feature is to be used for any patient telephone interaction over 5mins in length that is not a pre-booked telephone visit.

1. From the home page on the screen choose PM Conversation and Telephone Visit.

2. Type patient name in the search field and click the search button.
3. Once you find the patient click **Add Encounter** to make a telephone visit encounter.

NOTE: if you do not find the patient, connect with your Ward Clerk to ensure patient information has been entered in the system.

- You will receive the following message and click “OK”. You will get the following message asking if you would like to open the chart. Click “Yes”.

- Launch into the patient chart and locate the powerform you would like to complete. This can be done either through adhoc charting or through the vital sign drop down “carrot”.

Adhoc Charting

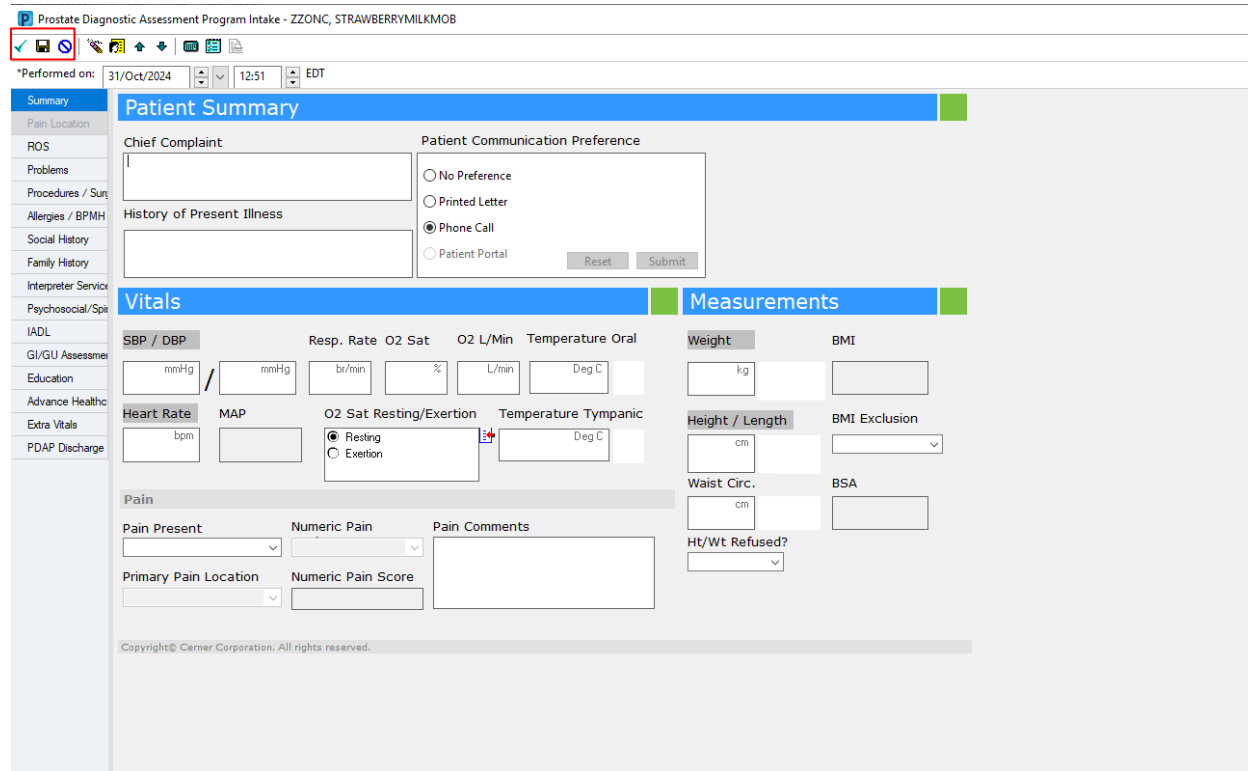

8. The ambulatory folders will show, navigate to your clinics appropriate folder.

9. Now you can pick your clinic form or the generic telephone visit form.

Within the forms the buttons on the top are for the following:

- ✓ - Submit
- 📄 - Save but **NOT** Submit, when you use this you can reopen your forms in **Form Browser**. Double click the forms to reopen and continue charting.

Vital Sign Drop Down Carrot:

1. When in your patient chart, select **Outpatient View** if not already open.

TIP SHEET

HOSPITAL INFORMATION SYSTEM (HIS)

The screenshot shows the 'Outpatient View' for patient ZZTEST, AMB. The 'Vital Signs' section is active, displaying a table of vital signs over time. A red arrow points to the 'Vital Signs' tab in the left-hand navigation menu.

	10 OCT 2024	30 JUL 2024	30 APR 2024
BP	mmHg	16/16	118/60
HR	beats	60	60
Temp	deg C	37	37
Respiratory Rate	breaths	16	16
SaO2	%	98	98
Weight Strong	kg	121.000	121.000
Weight Measured	kg	121	121

2. Now navigate to the **Vital Signs** section, here you will locate the “carrot” icon

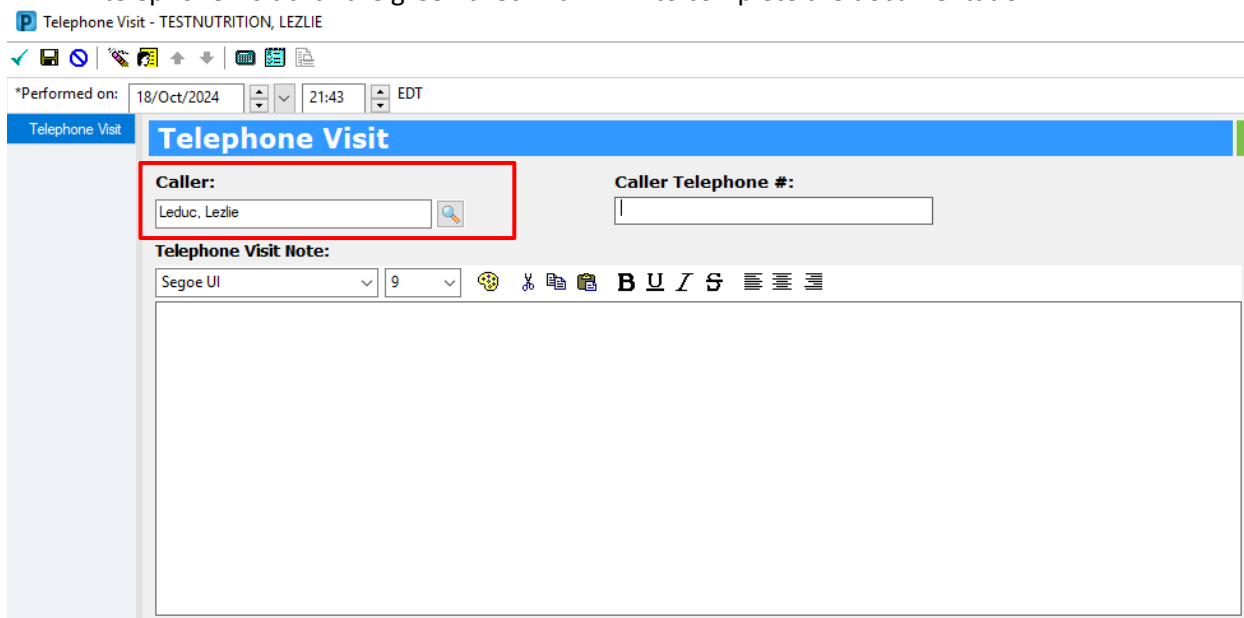

This screenshot is similar to the first one but highlights the 'Vital Signs' section in the left-hand navigation menu with a red arrow. Additionally, a red arrow points to the 'Vital Signs' tab in the top right corner of the main content area.

3. From the drop-down list, select **Telephone Visit**.

4. Document your patient encounter. On the telephone visit form you can add the caller name and number by searching with the  and finding the clinician's name. Once you complete the telephone visit click the green checkmark  to complete the documentation

5. This will document the power form in the chart and register a telephone visit as an encounter.
