

BRIDGE- MASSIVE TRANSFUSION PROTOCOL

For MTP or Code Omega, document transfusions using Bridge

Multi- Unit Transfusion

1. Launch **Oracle Bridge** from the Tool Bar

2. Scan the patient's wristband

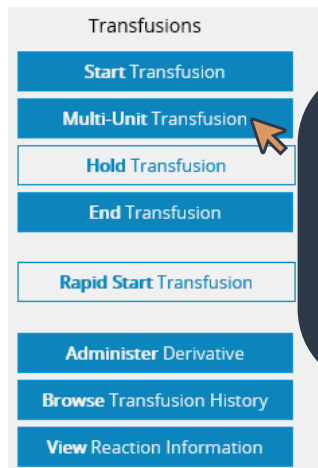

3. Record Vitals in Bridge

Bridge vitals flow to Power Chart, Power Chart vitals do NOT flow to Bridge

4. Click **Multi- Unit Transfusion**

Two users can work in the same patient file at a time- one to maintain all blood products, one to enter vitals

5. Check **Transfusion Orders** and **Blood Results**

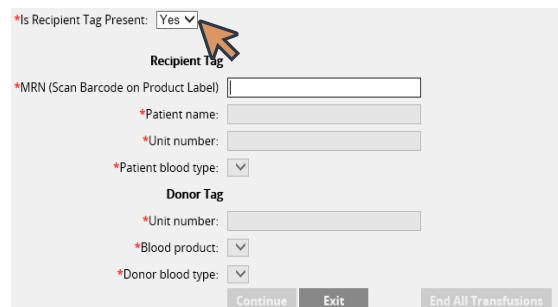

6. Complete Pre- Transfusion Check, and click **Continue**

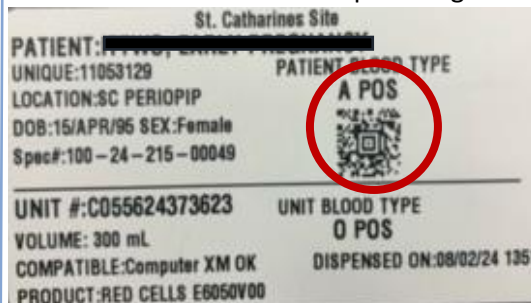

Red asterisks (*) are mandatory fields

7. Is **Recipient Tag** Present? **Yes**
If **No** is selected, skip to step 8

Recipient tags are Blood Bank Issue Labels with patient and blood product information. Select Yes if recipient tag is complete (patient's name, DOB, MRN#, and blood type). This will be the case for crossmatched blood products. Otherwise, select No.

If **recipient tag** is complete and **Yes** is selected, scan the Blood Bank Cross Match Recipient Tag.

BRIDGE TRANSFUSION ADMINISTRATION HOSPITAL INFORMATION SYSTEM (HIS)

8. Is Recipient Tag present? No

*Is Recipient Tag Present: No Yes

Donor Tag

*Unit number:

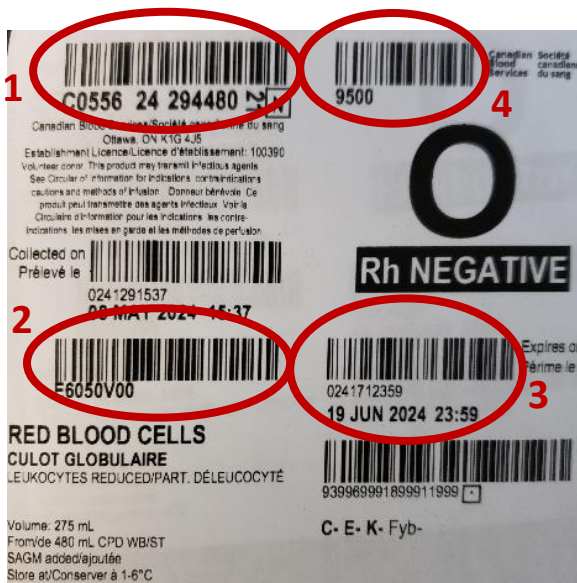

*Blood product:

*Donor blood type:

If recipient tag is not complete, select No.

9. Scan the Blood Donor Bag Labels (U pattern)

- 1 Scan the **Unit Number**
- 2 Scan the **Blood Product**
- 3 Scan the **Expiration Date**
- 4 Scan the **Donor Blood Type**

10. The second nurse does their independent double checks and enters their credentials. Click **Continue**

Cosignature

Independent Double Check: Includes verification of correct patient, line set up and pump programming

*User ID:

*Password:

Independent double check is completed at the bedside as per policy

11. The blood component will appear in a table format below. Repeat steps 7-10 to **"Add"** the other ordered blood components to this table.

Date/Time	Blood product	Unit number	Division	Donor blood type	Crossmatch	Verify	Volume	Reaction	End Transfusion Date/Time	Release
9/9/2024 14:32 EDT	RBC CPD AS1 500	W067108071803	00	O negative	No	<input type="checkbox"/>				<input type="button" value="Start"/>
9/9/2024 14:24 EDT	RBC CPD AS1 500	W067108971803	00	O negative	Yes	<input type="checkbox"/>				<input type="button" value="Start"/>

The table lists in reverse chronological order with the most recently scanned component at the top

12. When all components are added, click the **Verify** radial button

Add Verify

Donor blood type	Crossmatch	Verify	Volume	Reaction	End Transfusion Date/Time	Release
O negative	No	<input type="checkbox"/>				<input type="button" value="Start"/>
O negative	Yes	<input type="checkbox"/>				<input type="button" value="Start"/>

13. To select the blood bag to transfuse, either:

- a. Scan the **Unit Number** and the **Blood Product** of the blood bag

OR

- b. Click **Verify** beside the blood details that match the blood bag

14. Click **Verify & Start** once the blood has reached the patient

Verify / Start

Do you want to verify or verify and start the Blood Product?

After adding all the components, exit the screen to **Record Vitals**, as per policy, and return to Multi- Unit Transfusion

Bridge vitals flow to Power Chart, Power Chart vitals do NOT flow to Bridge

BRIDGE TRANSFUSION ADMINISTRATION HOSPITAL INFORMATION SYSTEM (HIS)

15. When the blood bag is finished infusing, enter the volume transfused and if a reaction occurred

Unit number	Division	Donor blood type	Crossmatch	Verify	Volume	Reaction	End Transfusion Date/Time	
8071803	00	O negative	No	<input type="checkbox"/>				Start
8971803	00	O negative	Yes	<input checked="" type="checkbox"/>			9/3/2024 14:47	End

16. Update the End transfusion date/time, click **End**

Date/Time	Blood product	Unit number	Division	Donor blood type	Crossmatch	Verify	Volume	Reaction	End Transfusion Date/Time	
9/3/2024 14:32 EDT	RBC CPD AS1 500	W067108071803	00	O negative	No	<input type="checkbox"/>				Start
9/3/2024 14:24 EDT	RBC CPD AS1 500	W067108971803	00	O negative	Yes	<input checked="" type="checkbox"/>	250	No	9/3/2024 14:51	End

17. Enter access site of transfusion, click **Continue**

* IV Site:

* Site of Administration:

Continue **Exit**

18. The transfusion status updates

Division	Donor blood type	Crossmatch	Verify	Volume	Reaction	End Transfusion Date/Time	
O POSITIVE	No	<input checked="" type="checkbox"/>	200.00	No	9/25/2024 14:13		Transfusion Ended

19. Repeat steps 13-16 to start and end the other ordered blood components, ensuring that the **Verify** radial button is selected.

Date/Time	Blood product	Unit number	Division	Donor blood type	Crossmatch	Verify	Volume	Reaction	End Transfusion Date/Time	
9/3/2024 14:32 EDT	RBC CPD AS1 500	W067108071803	00	O negative	No	<input type="checkbox"/>				Start
9/3/2024 14:24 EDT	RBC CPD AS1 500	W067108971803	00	O negative	Yes	<input type="checkbox"/>				Start

20. **Exit.**

Remember to record post transfusion vitals in Bridge!

Administer POOLED Derivatives- IV Infusible

1. Click **Administer Derivative**

Exit

The pooled IV bag will have multiple labels on it. Each label is scanned in Bridge

3. Scan the **recipient tag**

* MRN (Scan Barcode on Product Label):

* Patient Name:

* Lot #:

St. Catharines Site

PATIENT: [REDACTED]

UNIQUE:11053272

LOCATION:SC NHEMO

DOB:28/FEB/48 SEX:Male

Spec#:100-24-235-00090

PATIENT BLOOD TYPE: B POS

UNIT #: [REDACTED]

UNIT BLOOD TYPE: [REDACTED]

VOLUME: [REDACTED]

DISPENSED BY:BRIAN.THONG

PRODUCT: [REDACTED]

DISPENSED ON:08/22/24 1408

EXPIRY:06/18/26

BRIDGE TRANSFUSION ADMINISTRATION HOSPITAL INFORMATION SYSTEM (HIS)

4. Scan the **product label**

* Lot # Validation:

* Expires:

5. Enter **derivative product** and '0' for **volume** for the first labels. Always enter a volume in field even if it is '0'

* Fibrinogen Product:

Dosage:

Volume: mL

IV Site:

6. Complete mandatory fields. Second nurse to complete their **independent checks**. Click **Start**

* Consent verified per policy:

Comment:

* 2nd HCP Verify Two Patient Identifiers:

* 2nd HCP Verify Tubing Setup/Pump Program:

Start **Exit**

7. Second nurse must enter their credentials to **co-sign**. Click **Start**

Cosignature

* User ID:

* Password:

Start **Exit**

8. Repeat steps 5-10 for all patient and derivative product labels. This captures all of the product information in the pooled bag.

Started	Derivative	Reaction	Administered Volume(mL)
10/1/2024 14:36 EDT	Fibrinogen	▼	200.00
10/1/2024 14:33 EDT	Fibrinogen	▼	0
10/1/2024 14:32 EDT	Fibrinogen	▼	0
10/1/2024 14:28 EDT	Fibrinogen	▼	0

Table is in reverse chronological order (last product scanned appears on top)

💡 Enter the total pooled bag dosage and volume for the LAST derivative label ONLY. Otherwise, enter '0' zero for other derivative labels to avoid duplication. 💡

9. After the second nurse co-signs, Derivative status will show as **Administer Started**.

Derivative	Lot#/Serial#	Status	ExpirationDate	Update
Fibrinogen	C09H078183	ADMINISTER STARTED	8/14/2026 00:00 EDT	<input type="text"/>
Fibrinogen	C09H078183	ADMINISTER STARTED	8/14/2026 00:00 EDT	<input type="text"/>

Start times will need to be edited later on to capture accurate data

Don't forget to record vitals in Bridge 😊

BRIDGE TRANSFUSION ADMINISTRATION HOSPITAL INFORMATION SYSTEM (HIS)

Pooled Fibrinogen IV is finished transfusing... almost there!

Ending Infusible Pooled Derivative

1. Open **Oracle Bridge** from Power Chart toolbar and **scan patient's wristband**
2. Click **Administer Derivatives**
3. Once pooled IV bag is finished transfusing, click the box under the **Updated** column

Updated	Started	Derivative
<input checked="" type="checkbox"/>	10/1/2024 14:28 EDT	Fibrinogen
<input type="checkbox"/>	10/1/2024 14:28 EDT	Fibrinogen

4. **Update the Date/Time** derivative by clicking in the field. Record if a **reaction** occurred by selecting Yes/No.

Update Date/Time	Reaction	Administered Volume(mL)
10/1/2024 15:07	No	

5. Update the administered **volume** if needed, click **Complete**

No	200.00
Hold	Complete

6. Repeat steps 3-5 for each derivative. End the derivatives with the same time under **Update Date/Time** column by using backspace and entering the time for each

Remember, only enter the total pooled bag volume and dosage for the last derivative

Update Date/Time	Reaction	Administered Volume(mL)
10/1/2024 15:07	No	0
10/1/2024 15:07	No	0
10/1/2024 15:07	No	0
10/1/2024 15:07	No	200.00

Administer Derivatives

* Select blood plasma derivative:

Start Exit
