

Oxytocin Tip Sheet Nursing

- Upon receiving an order to commence Oxytocin
- Please ensure Oxytocin Safety Guidelines are followed as per NH policy
- Oxytocin order is inputted by OB
- Navigate to Nurse Review column on tracking board

- Double click on Nurse Review icon in patient row
- Nurse Review window will open and you will review the new orders
- Navigate to the Oxytocin Safety Checklist in IView by selecting the Labour and Delivery band scrolling down to the Pre-Oxytocin Use Checklist section before starting infusion and complete all components
- You will note the light blue text on each field, once selected will open reference text for more information and practice requirements

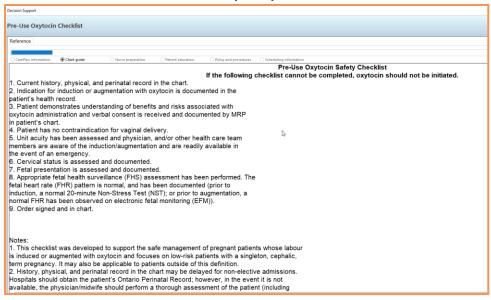

Example of Reference Text "Pre-Use Oxytocin Safety Checklist"

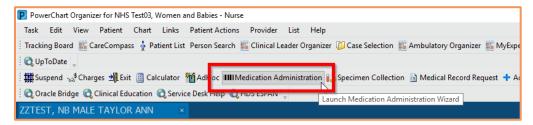

Once Pre-Use Checklist is completed, Independent Double Check is mandatory for initiation (IDC done in med admin window)

Document Oxytocin Administration

 Document administration of oxytocin by selecting the Medication Administration Wizard button in the grey toolbar

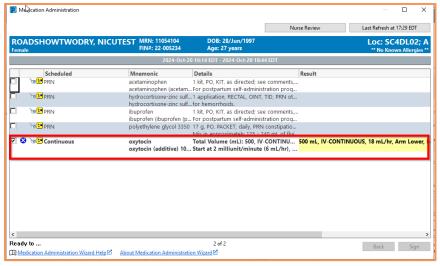

- Scan the Patient's wristband
- Scan the medication and solution
- The Result column for oxytocin is yellow, which means there are required fields to fill out for the medication administration. Select the result yellow field.

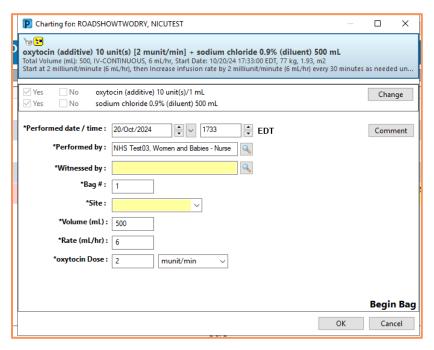

• A window opens to chart the medication administration. The oxytocin medication instructions display at the top. Fill in the required yellow fields, including witnessed by, then press **OK**.

• Nurse witness to fill in their password then press **OK**.

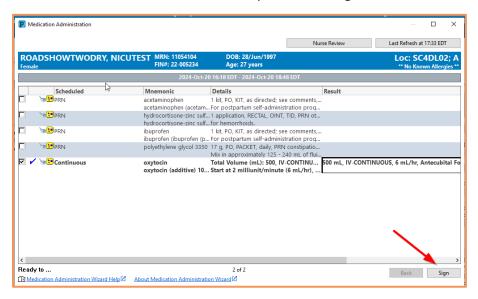

• Medication administration documentation complete, select Sign.

 To see the completed and signed administration, navigate to the MAR in the blue table of contents

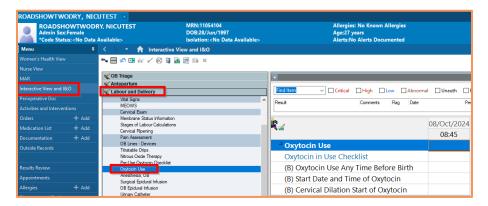

Documenting in the Oxytocin In Use Checklist

- For the Oxytocin in Use Check list navigate to the Labour and Delivery band and scroll to the Oxytocin Use section
 - o This band will highlight the Oxytocin in Use Checklist
 - Also available is a reference text for direction of usage in accordance to NH policies i.e. completion every 30 mins and direction what to do if not completed.
 - You will have to navigate to this section every 30 minutes and to adhere to the Oxytocin Safety Guideline's and NH policy.

Titrating Documentation for Oxytocin

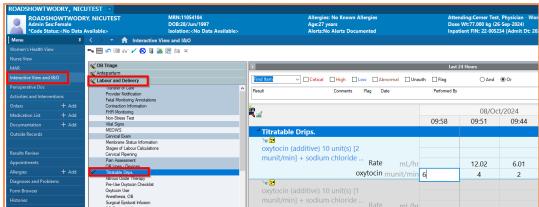

• Titratable Drips section is where the Oxytocin infusion will be found

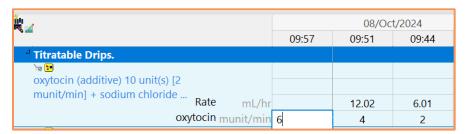

- The infusion will start at the order selected start rate e.g. 1munit/min =1 or 2muint/min=2
- Hover over the medication to review order details
- To increase the rate, double click on munit/min in the time column and increase as per order and click the green checkmark ✓ to Sign your documentation

- To **Stop** infusion input **0** in the munit/min field and this will indicate in the Intake and Output section the infusion has been Stopped
- Navigate to the Intake and Output band in IView to review and document intake
- Activate the cell by double clicking on Continuous Infusion banner under the time column to view the intake
 - To Modify infusion volume double click the cell and erase pre-populated volume to reflect pump volumes
- Then click the green checkmark
 to Sign
