

### Paediatric Falls Risk Scale: Humpty Dumpty Scale

The Paediatric Falls Tool is being replaced by the **Humpty Dumpty Fall Scale**. This scale will be completed by the nurse as per facility policy. The scale can be found within the Paediatric System Assessment band.

Clicking on [blue hyperlinks](#) will open up useful reference text to help guide the nurse on using

# TIP SHEET

## HOSPITAL INFORMATION SYSTEM (HIS)

High Humpty Dumpty Scores will show when the user hovers over the red triangle on CareCompass.

The screenshot shows the CareCompass interface with a patient list. A tooltip is displayed over the patient 'INI THREE, WSSEVEN', showing a 'High Risks' warning and a 'Humpty Dumpty Score' of 14. The score is highlighted in red with an upward arrow. The normal range is (7 - 12). The tooltip also shows 'Display: Seizure Precautions', 'Details: 27-Feb-2024 11:56:00 EST', and 'Date/Time: Feb 27, 11:56'. The patient list includes the following entries:

Location	Patient
SC 4BA	
--	SYSTEMTEST, GLFOUR 8m   Male   --   No Relationship Exists
SC4B01 - A	INI THREE, WSSEVEN High Risks Display: Seizure Precautions Details: 27-Feb-2024 11:56:00 EST Date/Time: Feb 27, 11:56
SC4B01 - A	
SC4B02 - A	Display: Humpty Dumpty Score ↑14 Normal Range: (7 - 12)
SC4B99 - A	Date/Time: Feb 27, 08:46 Status: Auth (Verified)
