TestBuilder Script(s):

Cerner Workflow ID: 1857 (v. 19.0)

Client Workflow ID: 504

Workflow Notes: For the steps to configure and follow the workflow, see [Understand Refused Orders Workflows](#).

With this workflow, providers can refuse orders requiring cosignature, which are routed to a Refused

Orders inbox the Health Information Management department monitors.

If the refused order is on the wrong patient or encounter, the workflow steps vary depending on if the refused order is a Patient Status Order. It is crucial that refused orders are monitored on a daily basis and are corrected as soon as possible. Unaddressed refused orders can lead to patient safety risks and incomplete medical records.

Workflow Link: HIM - Deficiency Management: Refusals (Cosign Orders)

Decision [38417]

Description: Is the order a Patient Admission Order (PAO)?

Decision [38476]

Description: Is there already an active PAO on the encounter that is not refused?

Decision [38506]

Description: Is the refused order the same PAO as the active PAO?

Comments: For example, the refused order is PSO Admit to Inpatient and there is an active PSO Admit to Inpatient order on the encounter.
