Notes and Considerations

Incorrect Order Procedures

- When orders are routed to the Prescriber's Message Centre for co-signature, Prescribers have the option to refuse to sign the order and provide a reason, such as "incorrect order" or "incorrect Prescriber." Reducing verbal and telephone orders can help minimize instances that lead to the refused order workflow. If an order can be updated in real time, the Prescriber should communicate directly with interdisciplinary staff to make corrections to the order profile or task list, and/or complete the Incident Reporting System (IRS) as necessary.
- During all clinical hours, if an order is identified as refused, immediate communication should occur between the Prescriber and the nurse, charge nurse, or nursing unit manager to facilitate prompt investigation and reconciliation.
- An IRS should be completed to document these incidents when they occur.

Incorrect Prescriber Procedures

- Prescribers may forward the order request to another Prescriber or send it to the Health Information Management (HIM) Refusal Inbox.
 - Forwarding to Another Prescriber: Click the "Forward Only" button on the Inbox toolbar and enter the name of the appropriate Prescriber to sign off on the order.
 - Sending to HIM Refusal Inbox: Select "Refuse" in the Action Pane and document the reason in the dropdown or free-text field. The order will be marked as refused in the Message Center.

Notes and Considerations Continued

- A decision is still pending regarding whether to have a single HIM inbox for NHS or multiple inboxes, as well as a separate HIM inbox for the HDS site.
- The appropriate Prescriber will receive the forwarded proposed order for co-signature in the Message Center, where they can choose to approve or refuse the order. To approve, they can click "OK & Close" or "OK & Next" to address the next order in the Inbox. If the order is refused, it will be sent back to the original ordering Prescriber for co-signature, appearing in their Inbox.
