# PERIOP Orders & PowerPlans

## Orders

The Orders page provides a centralized view to review, place, and modify patient orders. It offers the most comprehensive display of orders, including initiated orders, discontinued orders, planned order sets, and future orders.

Throughout your shift, you will use this page to access and review the full list of your patient's orders.

## How to Access Orders from PowerChart:

1. In the patient's chart, select Orders from the Menu

Orders + Add

2. On the left side of the Orders section is the navigator (View), which contains various categories:

- Plans
- Orders
- Medication History
- Reconciliation History

3. The Orders Profile located on the right side is where you can review the list of All Active Orders.

• You can hover to discover by moving your cursor over the icons for additional information

Order is part of a PowerPlan (Order Set)

Order is available to be scheduled for an appointment

Order requires nurse review

Order has a reference text information

There are comments added to the order

The order has not yet been verified by Pharmacy

4. The display setting filter is defaulted to All Active Orders. You can modify the display to other order statuses by clicking on the blue hyperlink above the Order

**PowerPlans** are referred to as order sets because they consist of a group of individual orders. A PowerPlan can encompass various types of orders, including patient care, medications, diet, diagnostic tests, lab, radiology, and consult orders **Perioperative PowerPlans: Periop PowerPlans have the following prefixes: SURG, ANES** 

PowerPlans are ordered by the providers ahead of time and they are in a planned state. It is only to be initiated in the appropriate phase when a nurse is about to carry them out.

#### **Reviewing and Initiating a PowerPlan**

• *Preoperative Orders:* The nurse should initiate any available Pre-Planned PowerPlan(s) before proceeding with the pre procedure checklist. Some order may carry to the Intraoperative phase

• *Postoperative Orders:* The recovery nurse should initiate any postoperative phase orders within a PowerPlan. The postoperative will also have to initiate an ANES postoperative orders placed by the Anesthesiologist.

## Adding an Order to a Phase

1. Click on a phase to add a new order. The phase could either be in Initiated or Planned status

2. Within the selected phase, click on 'Add to Phase' in the Order Profile

🕂 Add to Phase 🔹 🛕 Check Alerts 🛄 C

Add Order...

Add Outcome / Intervention...

+ Add to Phase\* and click on Add Order to open the Add Order window

- 3. Enter your order
- 4. In the Ordering Physician window, enter the physician's name and select the Verbal/Phone with Read Back (Cosign) as the communication type. Click OK

Note: Verbal/Phone with Read Back orders that nurses enter in the PowerChart will be automatically routed to the ordering provider for co-signature

5. Click Done to close the Add Order window. Review the added order and edit the details if necessary/required.

- 6. Click Orders for Signature and click Sign.
  - If you are adding an order to a 'Planned' phase, click Initiate now to Initiate the phase

 Adding an order to an Initiated phase, you will only need to click Orders for Signature and Sign

## **Ordering a Medical Directive**

Orders

+ Add

- 1. Click on the + Add to Add a new order 2. Type in Medical Directive in the search field. Hit the Enter on your keyboard to locate the Medical Directive order
- 3. Select the appropriate Medical Directive.
- 4. Click Initiate Now. Click Orders for Signature. Click Sign
