

PHYSICIAN INTERPRETATION IN CARDIOVASCULAR HOLTER MONITOR AND STRESS TESTS

VIEWING ORDERS FOR INTERPRETATION

Once Holter monitor and stress test orders have been completed by the technologist, they will be responsible for transmitting the study electronically to Millennium. The study will be viewable in the Cardiovascular module of PowerChart and the performing technologist or nurse will be responsible for assigning the study to a physician for dictation.

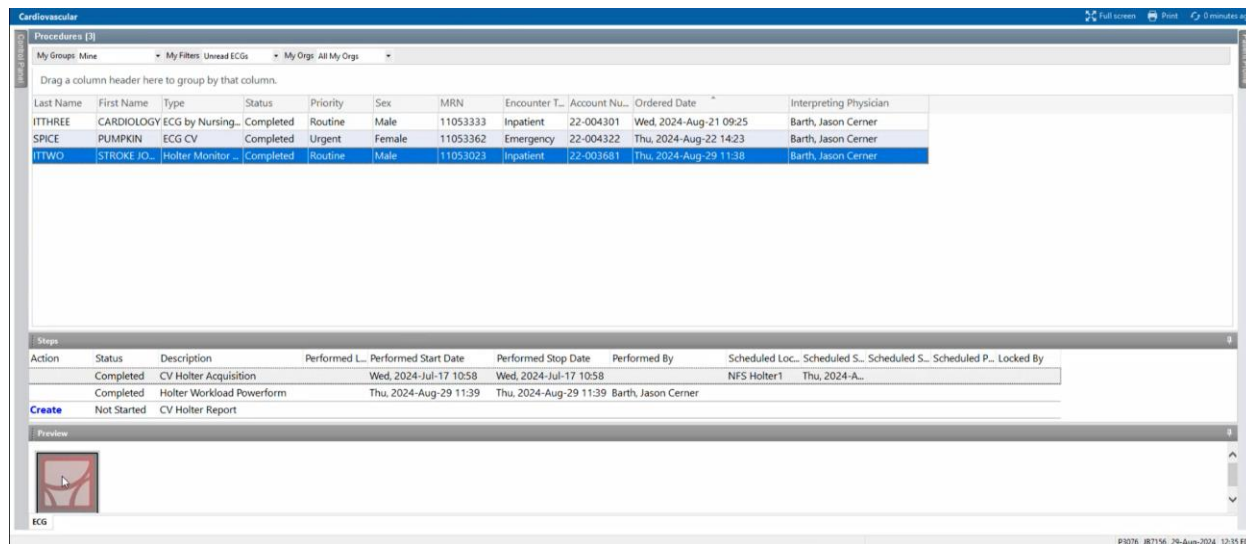

Last Name	First Name	Type	Status	Priority	Sex	MRN	Encounter Type	Ordering Physi...	Performed Start ...	Performed Stop ...	Comments	Interpreting Physician	Location	Study State
ZZZTEST	DONOTUSEMALE...	ECG by Nursing ...	Ordered	Routine	Male	11948235	Inpatient	Test, IMO -> IMO			N		SC 11A, SC1M02...	Not Matched
ZZZTEST	DONOTUSEMALE...	ECG CV	Signed	Routine	Male	11948235	Inpatient	Test, IMO -> IMO	Thu, 2024-Oct-17...	Thu, 2024-Oct-17...	N	Arya, Shoban	SC 11A, SC1M02...	Matched Viewable
ZZZTEST	DONOTUSEMALE...	ECG by Nursing ...	Ordered	Routine	Male	11948235	Inpatient	Test, IMO -> IMO			N		SC 11A, SC1M02...	Not Matched

To view orders assigned to you (the interpreting physician) that are ready for interpretation,

1. Navigate to **Cardiovascular** by clicking the red heart (♥) icon in the toolbar in PowerChart.
2. Under the **Interpreting Physician** column, you will find the assigned physician's name.
3. Under the **Status** column, the study should be listed as **Completed**.
 - If the Status column indicates **Unsigned** or **ED Review**, it indicates and ED physician or another physician has the report open for a wet read or dictation. **Ordered** status simply indicates the patient's cardiovascular order is pending completion.
4. Under the **Study State** column, the study should be listed as **Matched Viewable**, meaning the completed study has been transmitted to Millennium and is viewable in PowerChart.
5. Under the **Type** column, the type of Cardiovascular study (ECG, Holter monitor, or stress test) that was performed on the patient will be listed.

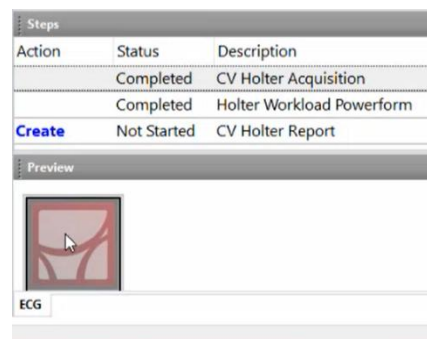

If you cannot see the aforementioned columns in your Cardiovascular worklist, refer to the **Changing Column Headers in Cardiovascular Worklist** tip sheet. If you need to change the Interpreting Physician for a patient, refer to the **Assigning an Interpreting Physician in Cardiovascular** tip sheet.

INTERPRETING HOLTER MONITOR AND STRESS TESTS

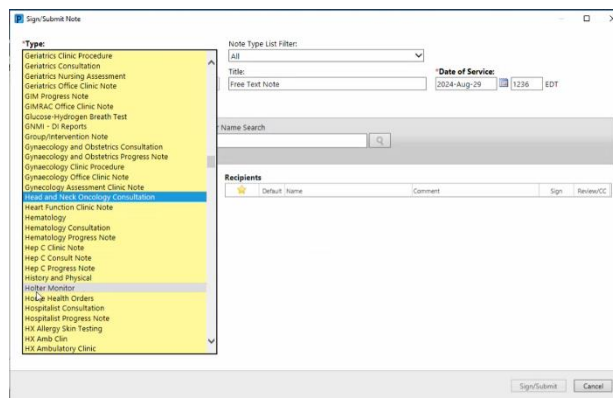

Last Name	First Name	Type	Status	Priority	Sex	MRN	Encounter T...	Account Nu...	Ordered Date	Interpreting Physician
ITTHREE	CARDIOLOGY	ECG by Nursing	Completed	Routine	Male	11053333	Inpatient	22-004301	Wed, 2024-Aug-21 09:25	Barth, Jason Corner
SPICE	PUMPKIN	ECG CV	Completed	Urgent	Female	11053362	Emergency	22-004322	Thu, 2024-Aug-22 14:23	Barth, Jason Corner
ITTWO	STROKE JO	Holter Monitor	Completed	Routine	Male	11053023	Inpatient	22-003681	Thu, 2024-Aug-29 11:38	Barth, Jason Corner

1. In Cardiovascular, look for the patient assigned to you with Holter Monitor or Stress Test in the Type column and is also listed as **Completed** under the Status column and **Matched Viewable** under Study State.
2. **Single-click** on the study.
3. Under the **Preview** pane, double-click the report thumbnail. This will open the report transmitted from the Holter monitor or stress machine.
4. With the Holter monitor/stress test report open, click **Create** (in bold, blue text) under the Steps pane. This will open **Dynamic Document** where the interpretation can be edited. This editor can also be used with Dragon Medical One speech recognition for verbal dictation.
5. If you have completed interpretation, click **Sign/Submit**.
6. The **Sign/Submit Note** window will open. Click the drop-down menu under ***Type:** and select **Holter Monitor** or **Stress Test Cardiac** depending on the type of study you are dictating. This is an important step to accurately display the patient's result in PowerChart.
7. Click **Sign**.

Action	Status	Description
	Completed	CV Holter Acquisition
