

Applications used by MLAs and Gen Lab MLTs

Pre-Analytical Applications

1. **Power Chart** – Used for specimen collection.

2. **Department Order Entry (DOE)** – Used to place test orders.

3. **Specimen Log-In** – Used to log specimens into the lab once they have been collected.

4. **Collections Inquiry** – Used to view and print Timed Study tests, AM Rounds etc...

5. **Container Inquiry** – Used to view containers associated to an accession #, review events (ie. who collected, who received, who resulted..etc) and review routing.

6. **Collections Resolutions** – Use to merge add on tests already collected.

7. **Collections List** – Used to preview collection routine collect runs (batches).

8. **Modify Collections** – Used to edit collector, date and time of collections etc...

9. **Label Reprint** – Used to reprint a specimen collection label.

10. **Label Pre-Print** – Used to print downtime labels.

11. **Specimen Transfer** – Used to transfer specimens from site to site and to reference labs.

12. **Order Result View (ORE)** – Used to review current orders and previous results for a patient.

13. **Laboratory Console** – Used to monitor Add-On tests and STAT collections.

Analytical Applications

14. **Pending Inquiry** – Used on bench to track and review outstanding specimens.

15. **TAT Monitor** – Used on bench as a tracker with alerts for specimens logged into the lab.

16. **Accession Result Entry (ARE)** - Used to manually enter a result.

17. **Batch Result Entry** – Used to enter results for multiple accessions with the same order.

18. **Result Entry Microbiology** – Used to report out microbiology specimens.

19. **Report Request** – Used to print a hard copy of a report

20. **Workload Entry** – Used to manually enter workload units (ie. Non-service workload).

21. **Discern Report Portal** – Used to generate various management reports (ie. TAT reports).
