Comments: Smoking status for patients 13 years and older

Future State: Oncology - Ambulatory - Provider Visit

Cerner Workflow ID: 7848 (v. 14.0) Client Workflow ID: 626

Last updated by Brianna Blahut, May 21, 2024 1:23pm (UTC -4 hours)

Work Step [26219]

Description: Review Recommendations (e.g., Health Maintenance, HealthRegistries) and Preventive Care Advisor and follow up as indicated

Method: MPage

Value Impact: Patient Safety

Step Impact: Policy/Procedure

Comments: Oncologists may be monitoring for survivorship purposes and may revise frequency of screenings based on risk.

Preventive Care Advisor is licensed content and only available to clients who have purchased said license. For additional details please review the following [Preventive Care Advisor Reference Page](#).

CPC+ Considerations:

Establish a patient focused care plan to guide care management
CPC+ practices should utilize an IT-enabled, patient-centered care planning tool in order to support holistic care and a focus on beneficiary goals and preferences.
Enable providers to electronically capture the following care plan elements:
Advance directives and preferences for care
Patient health concerns, goals and self-management plans
Action plans for specific conditions
Interventions and health status evaluations and outcomes
Identified care gaps

Work Step [26220]

Description: Review/update Problem List

Method: MPage

Value Impact: Patient Safety

Step Impact: Regulatory

Regulatory Details: Certified Health IT (CHIT)
Medicaid Promoting Interoperability
Medicare Promoting Interoperability
Merit-based Incentive Payment System-PI
The Joint Commission (TJC)

Future State: Oncology - Ambulatory - Provider Visit

Cerner Workflow ID: 7848 (v. 14.0) Client Workflow ID: 626

Last updated by Brianna Blahut, May 21, 2024 1:23pm (UTC -4 hours)

Comments: Provider can move chronic problem to This Visit diagnosis and/or enter any new diagnosis for this visit

Medicare/Medicaid/MIPS Promoting Interoperability

Measure Considerations:

Clinical Information Reconciliation - Review of the patient's known medication allergies.

Work Step [19000]

Description: Review home medications, renew/refill medications, place prescription orders, and complete Medication Reconciliation as needed

Method: MPage

Value Impact: Patient Safety

Step Impact: Policy/Procedure

Comments: Follow the Medication Process for medication review and reconciliation

MIPS ACI Measure Considerations:

Clinical Information

Reconciliation - Review of the patient's medication, including the name, dosage, frequency, and route of each medication.

Modified Meaningful

Use Consideration:

The EP performs medication reconciliation for more than 50 percent. More than 50 percent of permissible prescriptions written by the EP are queried for a drug formulary and transmitted electronically using CEHRT

MIPS Clinical Performance Improvement Activity Consideration:

Implementation of medication management practice improvements

ACO Consideration:

ACO #12 Medication Reconciliation
