Cerner Workflow ID: 10326 (v. 9.0) Client Workflow ID: 76

Oct 11, 2024

Security Position(s): Physician - Hospitalist

Start/Stop [115]

- Description: From the Discharge Workflow MPage, navigate to Home Medications component and click "Discharge to Home"
- Comments: The "Discharge to Home" Medication Reconciliation window should be used regardless of the location the patient is being discharged to. The "to Home" verbiage is hard coded and cannot be changed.

Decision [126]

Description: What medications require reconciliation?

Decision [194]

Description: Was the Home med therapeutically substituted during the inpatient stay?

Decision [136]

Description: Should the patient continue taking the medication at home?

Decision [138]

Description: Should the patient continue taking the medication at home?

Comments: Typically, any new prescriptions that are needed based on this patient's stay will be created in this Discharge Meds Rec window.

You may also see prescriptions documented on an Inpatient stay if the medication was prescribed in Powerchart at another Outpatient encounter.

Decision [135]

Description: Should the patient continue taking the medication at home?

Decision [199]

Description: Should the substitute be continued?

Comments: Original home medication that was documented will be a separate line item from the therapeutically substituted medication. Prescribers should only continue one of them.

Decision [171]

Description: Does the medication require a prescription?

Future State: Phys Track- Medication Process - Discharge Medication Reconciliation

Cerner Workflow ID: 10326 (v. 9.0) Client Workflow ID: 76

Last updated by Tina Van Egmond, Mar 26, 2024 2:09pm (UTC -4 hours)

Comments: Therapeutically substituted med(s) can be reverted to the original form the patient was taking at home prior to admission.

Decision [183]

Description: Does the medication require changes warranting a new script?

Decision [140]

Description: Does the medication require refills/a new script?

Work Step [169]

- Description: Continue: not recommended because this does not generate a new Rx (just documented home med)
- Comments: The Continue option will document this medication as a Home Med (scroll icon) that will be available for in the BPMH if the patient returns to the organization.

Work Step [168]

Description: Create New Rx and print prescription requisition (and fax if appropriate) Comments: eFax not available at this time

Work Step [170]

Description: Do Not Continue

Work Step [181]

Description: Continue

Comments: If a prescriber wrote a new Rx during the patient's stay, that med is automatically going to be Continued in the Discharge Meds Rec window.

Work Step [182]

Description: Create New Rx and print prescription requisition (and fax if appropriate)

Comments: eFax not available at this time.

If a prescriber wrote a new Rx during the patient's stay, that med is automatically going to be Continued in the Discharge Meds Rec window. If the prescriber notices a mistake in the prescription details or wants to change any of those details, the prescriber should click the Prescription/Pill Bottle icon to discontinue the old Rx and update details on the new Rx.

Oct 11, 2024

Work Step [180]

Description: Do Not Continue

Comments: If a prescriber wrote a new Rx during the patient's stay, that med is automatically going to be Continued in the Discharge Meds Rec window. If the prescriber does not want the patient to go home with this prescription, they should click the Do Not Continue column to discontinue the medication.

Work Step [147]

Description: Continue

Comments: The Continue option will document this medication as a Home Med (scroll icon) that will be available for in the BPMH if the patient returns to the organization.

Work Step [144]

Description: Create New Rx and print prescription requisition (and fax if appropriate) Comments: eFax not available at this time

Work Step [142]

Description: Do Not Continue

Decision [150]

Description: Do additional medications require reconciliation?

Start/Stop [158]

Description: Click Reconcile and Sign
