

PRESCRIBERS

Since selecting a subphase as a quick order is not currently an option, it must be saved as a Favourite to include additional orders efficiently. The following steps will demonstrate how to add additional orders to a subphase using your **Favourites** folder, avoiding multiple lab labels from being generated.

EXAMPLE: Adding Vitamin B12 to LAB Basic Bloodwork (SMA7/CHEM7) Subphase.

- 1) Order the **LAB Basic Bloodwork (SMA7/CHEM7) Subphase**

Component	Status	Dose	Details
LAB Basic Bloodwork (SMA7/CHEM7) Subphase (Planned Pending)			
Laboratory			
This intent of this subphase is for ordering basic bloodwork (SMA7/CHEM7)			
Chemistry			
<input checked="" type="checkbox"/> Electrolytes (Na, K, Cl, CO2, Gap)			▼ Blood, Routine, once, T;N
<input checked="" type="checkbox"/> Blood Urea Nitrogen			▼ Blood, Routine, once, T;N
<input checked="" type="checkbox"/> Creatinine			▼ Blood, Routine, once, T;N
<input type="checkbox"/> Glucose Random			▼ Blood, Routine, once, T;N

- 2) At the top of the order window, select **Add to Phase > Add Order**.

- 3) Search for the desired order to be added (for this example we will add Vitamin B12). Click **Done**.

v.1 Jan 2025

ADDING ORDERS TO A SUBPHASE OR ORDERSET

HOSPITAL INFORMATION SYSTEM (HIS)

- 4) In the *Order Details Box*, set the **Collection Priority** field to **Routine**
- 5) Select **Yes** for **Nurse Collect**.
- 6) Click **Save as my Favourite**.

Details for Vitamin B12 Level

Details | Order Comments | Offset Details

*Specimen Type: Blood

4 *Collection Priority: Routine

Frequency: once

Duration: []

Duration unit: []

Collection Date/Time: **/**/**** [] [] EST

5 Nurse collect: Yes No

Order for future visit: Yes No

Research Account: []

Outside Lab: Yes No

Orders For Cost: [] **6** Save as My Favorite

NOTE: This way it prints as one lab label, as opposed to generating multiple labels for the entire order set

- 7) The order AND its additions have now been saved as a favourite on the **INPT Quick Orders Page**.
