### Swim Lane:

Role(s): Acute Prescriber [Custom]

Department(s):

Security Position(s):

### Start/Stop [4]

Description: Consult order to OT NICU or OT Pediatrics Assessment

### Swim Lane:

Role(s): Occupational Therapist

Department(s):

Security Position(s):

### Start/Stop [5]

Description: Receives notification of the tasking on Multi Patient Task List (MPTL) and/or Rehab Organizer

Step Impact: Training

## Future State: Rehab Therapies - OT Acute/Inpatient NICU/Pediatric Assessment and Ongoing Treatment (NH)

Cerner Workflow ID: Client Workflow ID: 1141

Last updated by Christina Carile, Jul 31, 2024 1:54pm (UTC -5 hours)

**Comments:** A consult order will remain in the task list up to 1 hour before the status of the task is considered "Overdue". Rescheduling the task will reset the task timer. You can only reschedule a task in the MPTL.

### **Work Step [7]**

Description: Review child's chart

### **Decision [8]**

Description: Is the child appropriate to participate in a therapy initial assessment?

### **Decision [13]**

Description: Was consent received to complete the Initial Assessment?

### **Work Step [20]**

Description: Complete Initial Assessment and Document the Assessment

Method: PowerForm

Step Impact: Training

**Comments:** If the task isn't visible on the MPTL or Rehab Organizer, Ad Hoc the assessment powerform to complete initial assessment.

### **Decision [22]**

Description: Is additional treatment/intervention required?

### **Work Step [25]**

Description: Ad Hoc treatment powerforms as needed to document child progress/interventions

Method: PowerForm

Step Impact: Training

**Comments:** - Ad Hoc OT NICU Treatment PowerForm for NICU  
- Ad Hoc OT Pediatric Treatment PowerForm for Pediatrics - Ad Hoc PowerForms from the child's PowerChart

### **Decision [28]**

Description: Does the child require further acute OT?

## Future State: Rehab Therapies - OT Acute/Inpatient NICU/Pediatric Assessment and Ongoing Treatment (NH)

Last updated by Christina Carile, Jul 31, 2024 1:54pm (UTC -5 hours)

### Start/Stop [12]

Description: Reschedule the task for a later date, and create a NOTE

Method: PowerForm

Comments: The therapist should "Reschedule" the task (option available up to 7 days or 168 hours after original Consult Order placed) to leave it in the MPTL without opening the PowerForm and signing. The task will remain on the task list for 7 days, but will be "Overdue" after 1 hour. You can only reschedule a task in the MPTL.

If rescheduling the task due to child not appropriate, the therapist is to document in the "NOTES" section of the Table of Contents. Click "+Add" in the Notes page. The NOTE "Type" is a required field. The "Type" should be "Rehab Reschedule Reason", and the Subject line should be filled in with an appropriate header to reflect the reason for rescheduling the task. For example, the therapists could write "Child not appropriate" in the Subject line. This Subject line will be visible in the Documents page, and easier for end-users to recognize the purpose of the Note.

If the therapist decides to use the "Chart Not Done" feature, it will COMPLETE the Order, and the task will disappear off the task list. The Consult Order associated with that specific task, will then show a status of COMPLETED. The PowerForm will then have to be Ad Hoc'd at a later time when the child is seen, but will not be tied to the original Consult Order.

### Start/Stop [24]

Description: Therapist discontinues child from caseload and documents; therapist cancels any related tasks on MPTL and/or Rehab Organizer

Method: PowerForm

### Start/Stop [30]

Description: Document recommendations in child's powerchart

Method: PowerForm

Step Impact: Training

Comments: -OT Discharge SMART Goals are important to fill out, to justify home care services

-Discharge SMART Goals can be found OT Discharge Summary PowerForm; Ad Hoc as needed.

## Future State: Rehab Therapies - OT Acute/Inpatient NICU/Pediatric Assessment and Ongoing Treatment (NH)

Last updated by Christina Carile, Jul 31, 2024 1:54pm (UTC -5 hours)

### Start/Stop [14]

Description: Reschedule the task for a later date, and create a NOTE

Method: PowerForm

Step Impact: Training

Comments: The therapist should "Reschedule" the task (option available up to 7 days or 168 hours after original Consult Order placed) to leave it in the MPTL without opening the PowerForm and signing. The task will remain on the task list for 7 days, but will be "Overdue" after 1 hour. You can only reschedule a task in the MPTL.

If rescheduling the task due to child/SDM Consent Not Obtained, the therapist is to document in the "NOTES" section of the Table of Contents. Click "+Add" in the Notes page. The NOTE "Type" is a required field. The "Type" should be "Rehab Reschedule Reason", and the Subject line should be filled in with an appropriate header to reflect the reason for rescheduling the task. For example, the therapists could write "Child/SDM declined assessment" in the Subject line. This Subject line will be visible in the Documents page, and easier for end-users to recognize the purpose of the Note.

If the therapist decides to use the "Chart Not Done" feature, it will COMPLETE the Order, and the task will disappear off the task list. The Consult Order associated with that specific task, will then show a status of COMPLETED. The PowerForm will then have to be Ad Hoc'd at a later time when the patient is seen, but will not be tied to the original Consult Order.
