Value Impact: Quality

Step Impact: Regulatory

Regulatory Details: Inpatient Quality Reporting

Comments: Data Element Name: Gestational Age
Collected For: PC-01, PC-02, PC-03 Definition: The weeks of gestation completed at the time of delivery. Gestational age is defined as the best obstetrical estimate (OE) of the newborn's gestation in completed weeks based on the birth attendant's final estimate of gestation, irrespective of whether the gestation results in a live birth or a fetal death. This estimate of gestation should be determined by all perinatal factors and assessments such as ultrasound, but not the newborn exam. Ultrasound taken early in pregnancy is preferred (source: American College of Obstetricians and Gynecologists reVITALize Initiative).

Work Step [28025]

Description: Review and update Pregnancy History, if applicable

Method: MPage

Comments: This should be done via the Pregnancy History Cloud Component, if available

If cloud component not available, Pregnancy History should be updated using the win64 Pregnancy History
control within the OB Admission PowerForm.

Work Step [27964]

Description: From Women and Babies View, complete OB Patient History PowerForm, including reviewing allergies, height, weight

Method: PowerForm

Value Impact: Quality

Step Impact: Regulatory

Regulatory Details: Inpatient Quality Reporting

Comments: Document: Prior Uterine Surgery, Previous Live Birth, History of Stillbirth

Within the OB Patient History form, the PPH Risk Assessment on Admission is included to document the
patient's postpartum risk assessment upon admission in accordance with CMQCC recommendations. CMQCC recommends the PPH Risk Assessment be completed once upon admission and then at minimum once per shift until 24 hours post delivery. Assessments can be done more frequently as patient conditions may change during the
